In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A sense of force imparting type input device comprising:

an outer casing;

an operating lever having a fulcrum inside the outer casing and being pivotably supported;

detecting means for detecting an operating state of the operating lever;

an actuator for imparting a feedback force to the operating lever; and

control means for controlling driving of the actuator based on output signals supplied from the detecting means,

wherein the outer casing is formed with a projecting shoulder having a polygonal shape in plan view, an outer surface of which serves as fingerhook, so that the operating lever is projected from an opening formed at a center of the projecting shoulder.

2.-4. (Cancelled)

5. (Previously presented) A sense of force imparting type input device according to Claim 1, wherein the projecting shoulder is formed into a substantially square shape in plan view.

6.-13. (Cancelled)
